

INSULAPACK™ - Insulated bubble/foil insulation for Truck Bodies

- Insulapack is a multi-layered insulating gas filled bubble sheet laminated to metalized film.
- Insulapack is a layered insulation that provides cost effective, high efficiency performance for a wide range of applications.
- Insulapack protects the contents of the box against external temperature penetration.
- Insulapack's R-value when laminated with metalized film (R-10.6 per inch) is based on multi-layered cells filled with an insulating inert gas and is unaffected by humidity or "thermal bridging".
- Insulapack has a very high R-value to thickness ratio.
- Insulapack will prevent up to 95% of radiant heat transfer
- Insulapack does not promote growth of mold or mildew, and does not provide for nesting of rodents, birds or insects
- Insulapack is elastic and Keeps its thickness over time (doesn't collapse)
- Light weight, clean, dust free and recyclable
- Non-toxic and recyclable.
- Safe and easy-to-use – no gloves or Masks required at installation
- Made in Canada
- Samples & Pricing available upon request.
