# Insulapack Fiber Features & Benefits

- Made from Polyethylene non-woven fiber.
- Designed to be customized to any size & thickness to meet specific requirements.
- Insulapack F's insulation protects the interior against external temperature penetration as well as against internal temperature loss
- Insulapack F is used for many different applications including Insulating, Wall Cavity's, Foundation's, Attic's and has a rating of R4.6 per inch and R6 when laminated to metalized film.
- Shipped in 48" rolls which can be customized for specific requirements.
- Helps maintain desired temperature within the area through all temperature fluctuations throughout the year.
- Being polyethylene, it is impervious to humidity and resists any type of mold or promotion of fungal growth.
- Will not appeal to nor attract rodents or insects.
- Non-toxic and meets all health and safety requirements. No VOC's
- Recyclable.
- Durable & Exceptionally Lightweight.
- Significantly beats all flame spread and smoke formation requirements.
- No gloves, goggles, mask nor special clothing/equipment is required. Will not cause any type of skin irritation.
- CERTIFICATION NUMBER ER38051
- Made in Canada
- Samples and Pricing available upon requests.
